### ***Reasons for Allowance***

2. Claims 10,12-13,15-16,39,44 will be allowed.

3. The following is an examiner's statement of reasons for allowance.

The prior art references most closely resembling the applicants claimed invention are Roberts et al (U.S. Patent No. 6,101,486) and Gilmour et al (U.S. Patent No. 6,421,669).

First, Roberts disclosed a method and system for gathering and storing customer profile data when the customer accesses a website location. However Roberts failed to disclose, “The link or URL referencing a web application for updating the electronic phonebook; wherein the link or URL includes a unique identifier uniquely associated with the second user and used for accessing the contact information of the second user; detecting a selection or click of the link or URL via the user device; in response to detection of the selection or click of the link or URL, invoking the web application for updating electronic phone book referenced by the link or URL; requesting that the first user present authenticating information to identify the electronic phonebook of the first user; identifying the electronic phonebook of the first user based on the authenticating information; identifying the contact information of the second user based on the unique identifier that is uniquely associated with the second user; adding the contact information of the second user to the electronic phonebook of the first user”. These limitations are incorporated into all of the independent claims (claim 10).

Second Gilmour disclosed, “A method of constructing an entity profile, having private and public portions with different access restrictions, commences with the assignment of a confidence level to content within an electronic document. However Gilmour failed to disclose, “The link or URL referencing a web application for updating the electronic phonebook; wherein the link or URL includes a unique identifier uniquely associated with the second user and used for accessing the contact information of the second user; detecting a selection or click of the link or URL via the user device; in response to detection of the selection or click of the link or URL, invoking the web application for updating electronic phone book referenced by the link or URL; requesting that the first user present authenticating information to identify the electronic phonebook of the first user; identifying the electronic phonebook of the first user based on the authenticating information; identifying the contact information of the second user based on the unique

Art Unit: 2443

identifier that is uniquely associated with the second user; adding the contact information of the second user to the electronic phonebook of the first user". These limitations are incorporated into all of the independent claims (claim 10).

In summary, the Examiner submits that Roberts and Gilmour taught all the limitations of independent claims in combination with other elements. Specifically prior art does not teach "The link or URL referencing a web application for updating the electronic phonebook; wherein the link or URL includes a unique identifier uniquely associated with the second user and used for accessing the contact information of the second user; detecting a selection or click of the link or URL via the user device; in response to detection of the selection or click of the link or URL, invoking the web application for updating electronic phone book referenced by the link or URL; requesting that the first user present authenticating information to identify the electronic phonebook of the first user; identifying the electronic phonebook of the first user based on the authenticating information; identifying the contact information of the second user based on the unique identifier that is uniquely associated with the second user; adding the contact information of the second user to the electronic phonebook of the first user"; therefore, claims 10,12-13,15-16,39,44 have been deemed allowable over the prior art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ADNAN MIRZA whose telephone number is (571)272-3885. The examiner can normally be reached on business hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tonia Dollinger can be reached on 571-272-4170. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
